Advance feature:**SECURITY FEATURES:****Login Security:**

- Sign-in using your password and your cell phone to vastly improve login security. This is called Two Factor Authentication and is used by banks, government agencies and military world-wide for highest security authentication.
- Includes two-factor authentication, also referred to as cell phone sign-in.
- Enforce strong passwords among your administrators, publishers and users. Improve login security.
- Checks the strength of all user and admin passwords to enhance login security.

Blocking Features:

- Real-time blocking of known attackers.
- Block entire malicious networks. Includes advanced IP and Domain WHOIS to report malicious IP's or networks and block entire networks using the firewall. Report security threats to network owner.
- Rate limit or block security threats like aggressive crawlers, scrapers and bots doing security scans for vulnerabilities in your site.
- Choose whether you want to block or throttle users and robots who break your security rules.

Security Scanning:

- Scans for the HeartBleed vulnerability - included in the free scan
- Scans core files, themes and plugins
- See how files have changed. Optionally repair changed files that are security threats.
- Scans for signatures of over 44,000 known malware variants that are known security threats.
- Scans for many known backdoors that create security holes including C99, R57, RootShell, Crystal Shell, Matamu, Cybershell, W4cking, Sniper, Predator, Jackal, Phantasma, GFS, Dive, Dx and many many more.
- Continuously scans for malware and phishing URL's including all URL's on the Google Safe Browsing List in all your comments, posts and files that are security threats.
- Scans for heuristics of backdoors, trojans, suspicious code and other security issues.

Firewall setting:

- Includes a firewall to block common security threats like fake Google bots, malicious scans from hackers and botnets.

Monitoring Features:

- See all your traffic in real-time, including robots, humans, 404 errors, logins and logouts and who is consuming most of your content. Enhances your situational awareness of which security threats your site is facing.
- A real-time view of all traffic including automated bots that often constitute security threats that Javascript analytics packages never show you.
- Real-time traffic includes reverse DNS and city-level geolocation. Know which geographic area security threats originate from.
- Monitor your DNS security for unauthorized DNS changes.
- Monitors disk space which is related to security because many DDoS attacks attempt to consume all disk space to create denial of service.

Multi-Site Security:

- Our security plugins security for multi-site also scans all posts and comments across all blogs from one admin panel.

IPv6 Compatible:

- Fully IPv6 compatible including all whois lookup, location, blocking and security functions.

CACHE FEATURES:

Google Page Speed improvements in overall site performance

Optimize Features:

- Improved web server performance. sustain high traffic periods
- Transparent content delivery network (CDN) management with Media Library, theme files and WordPress itself
- Mobile support: respective caching of pages by referrer or groups of user agents including theme switching for groups of referrers or user agents
- Caching of (minified and compressed) pages and posts in memory or on disk or on CDN (mirror only)
- Caching of (minified and compressed) CSS and JavaScript in memory, on disk or on CDN
- Caching of feeds (site, categories, tags, comments, search results) in memory or on disk or on CDN (mirror only)
- Caching of search results pages (i.e. URIs with query string variables) in memory or on disk
- Caching of objects in memory or on disk
- Minification of inline, embedded or 3rd party CSS (with automated updates)
- Browser caching using cache-control, future expire headers and entity tags (E-Tag) with "cache-busting"

ADVANCE SEO OPTIMIZATION:

Our Premium SEO Optimize Concept contains all the features

Title & Meta format:

You can setting up custom page titles, meta description, Meta keywords, Meta robots and social Meta using defined format tags for homepage, post, pages, category, tags, custom taxonomies, archives, authors, search, 404 page and pagination

Off page optimization:

- Back link Builder – automatically add your link to thousands of different website directories that will automatically provide free back links
- Link Builder – improve your site internal link building.
- 301 Link Redirect – useful for any permalink changes
- Social Stats - keep track of your social network size

Advanced setup:

- Files Edit - allows you to edit the robots.txt and .htaccess files.
- W3C Validator - Mass Check the markup (HTML, XHTML,) of your pages/posts/custom taxonomies.
- SEO Insert Code - Add custom code into < head > and wp_footer
- Media Smushit -For this module we use the Smush. It API that allows you to optimize the website images without changing their look or visual quality.
- Facebook Planner - The Facebook Planner module allows you to publish your website data directly to Facebook profiles / pages / groups

Advance SEO optimize settings:

- Modules Manager – allows you to activate / deactivate modules
- Capabilities - allows you to give certain permissions to different classes of users
- Setup/Backup – install default configuration, import SEO settings from other SEO plugins, backup current settings
- Server Status – the server status allows you to see what modules are active, if they are configured correct and so on

- Remote support – this allows you to give us secured access to your wordpress install, in case that you have issues with the plugin

Rich snippets:

- Rich snippets are the extra bits of information that you see on result pages, usually affecting visitor behavior and click through rates(CTR)
- They work well with google, bing, yahoo and facebook engines
- These rich snippets come in the form of reviews, event, people, product, recipes and more

Facebook planner:

- You can select what do post on facebook(post/pages), Auto-complete data from post/page, publish to facebook privacy option, schedule when to post on facebook, publish now on facebook option and more
